No classes: Thurs 8th Oct (prep for event)
Wed 11th Nov (PTC)
Wed 9th Dec (prep for concert)

[See details behind →](#)

Basketball w/ Ms. Su

Basketball involves skills such as dribbling, passing, catching, shooting, and pivoting, all of which help to improve motor skills by using large muscle groups. The coordination, specifically hand-eye coordination, required in basketball helps develop fine motor skills, which are skills that transfer to other daily activities.

What to Prepare: Shorts, a light T-shirt, suitable sports shoes and a water bottle for this activity! (Our lessons will be conducted outside.)

Energy Explorer & Adventure Fitness w/ Ms. Sea

Energy Explorer & Adventure Fitness will explore one of the most basic and beneficial activities for both the mind and the body: movement! Each week we will do different outdoor activities with movement as the central focus. From warm ups to stretching, circuit training, jumping rope, yoga, dancing, musical chairs, scavenger hunts, obstacle courses, tag, freeze game, and more. We will encourage ourselves to be present in our bodies and practice getting them moving while outside!

Soccer w/ Mr. Justin

During this course we will begin with the fundamentals of soccer/football. We will slowly roll out the rules of the game and the skills needed to perform while playing. Throughout all of these lessons our main goal is to have fun! I plan to teach the game of football/soccer by using a series of games and activities to keep students engaged.

What to prepare: Shorts, a light T-shirt, suitable sport shoes and a water bottle every Tuesday! (Our lessons will be conducted outside.)

Phonics Power Hour w/ Ms. Astrid

Children will learn phonics through play-like activities. Activities will be connected to what they are learning in the class. Children will enjoy phonics games & centers, stories, conversations, comprehension and lots more! They will build confidence in speaking/listening and reading/writing.

Zumba w/ Ms. Palki

Zumba means "moving quickly and having fun". It is the perfect way to incorporate exercise into children's lives in a fun, easy way with multiple personal and social benefits. Children will learn to move, listen to the rhythm, exercise their bodies and improve their health. It will give children an outlet to jump, dance, shake, and swing their hips.

What to wear: Sports shoes and socks, comfortable clothes ideal for fitness workouts like fitness leggings and an athletic top.

English Academy w/ Ms. Kelly

English Academy is an after-school program for 3-5 year-olds that blends play-based learning with a strong academic foundation in English language development. Children will build confidence, vocabulary, and early communication skills through storytelling, music, poetry, movement, and small group differentiation. Language themes will include family, friendship, school, food, nature, and community. Students will learn basic vocabulary and begin to construct more complex sentences in English.

STEM + Lab Explorers w/ Ms. Tara

STEM stands for Science, Technology, Engineering, and Mathematics.

Our Stem & Lab Explorers class will focus on exciting **Hands-on Science Experiments** designed to spark curiosity and encourage young minds to explore the world around them. During this class, children will engage in STEM and hands-on science activities that are rooted in **play, inquiry, and creativity**. They will experiment, observe, ask questions, and make discoveries in a fun and supportive environment.

Through these engaging explorations, children will naturally develop important skills such as **problem-solving, critical thinking, creativity, and teamwork**—all essential foundations for future learning.

Clay Play w/ Ms. Beth

Clay play is an enjoyable activity amongst children. Clay helps build hand-eye coordination and develops children's small hand muscles, which is beneficial for writing, coloring, and cutting! Clay play helps students focus on the task for an extended period of time, and it is a calming and adaptable activity. It allows children to build their imagination and boosts their self-esteem too!

Remark: As it can be a messy activity, kindly send in an old t-shirt that is labelled that we can keep at school for this activity.

Athletics & Gymnastics w/ Mr. Justin

Gymnastics is an excellent activity for both boys and girls. It can help to develop self-confidence and self-esteem early in childhood. It enhances physical development and helps to develop skills like strength, flexibility, coordination, balance, and body control. Children will be involved in balancing activities, pass and catch, ropes and hoops and lots more!

Cooking w/ Ms. Kitty

Cooking is an excellent educational activity where children learn to explore their senses, make healthy choices, display responsibility and learn how to share a good conversation. We will be exploring different sweet and savory dishes from around the world and working with different recipes and ingredients.

Remark: If your child has any allergies/dietary restrictions, please inform me at kittykidskingdom@gmail.com

Ballet w/ Ms. Fang

In ballet class, your child will be engaged in different exercises that strengthen the whole body, improve flexibility, coordination and balance. Your child will learn about her body parts, the way to keep her spine straight and have a good body posture. Body movements will be accompanied by classical music. It will be a great way for your child to understand her body and enjoy dance and music at the same time!

Remark: For this class, please prepare ballet costumes and ballet shoes for your child.
